This program is designed to address the ways in which some of our large local organizations and entities are adapting to current economic realities. Representatives from Placer County Health and Human Services, City of Roseville and Sutter Health have agreed to provide a special briefing about how they are "doing business differently" by applying strategies such as collaboration, consolidation, regionalization and merged operations. The panel promises not only to offer ideas and strategies for our organizations, but also updates regarding these entities' operations in our community. The session also gives us an opportunity to network with these organizations, as well as together.

(Please note: Meeting rooms are accessed from the Main Entrance/Rotunda of the Civic Center. Free and unlimited parking is available at lot across the street at 400 Vernon Street.)
